

花雨

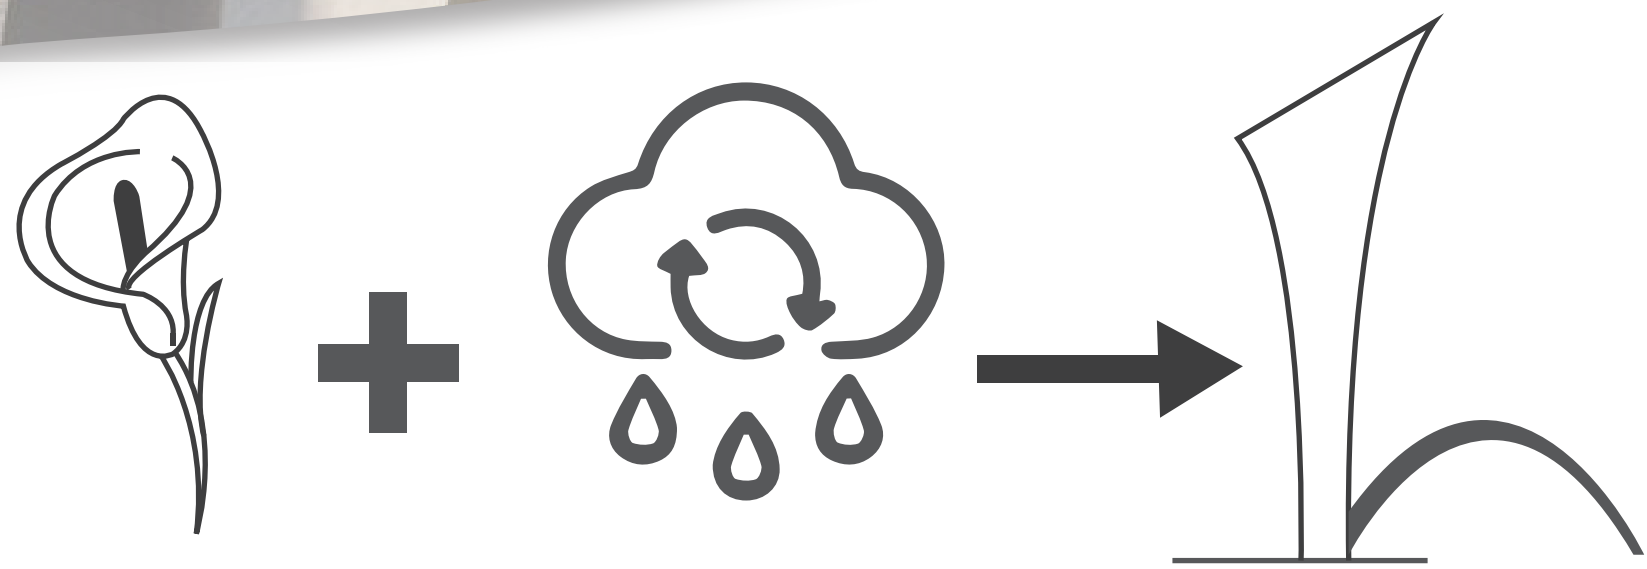

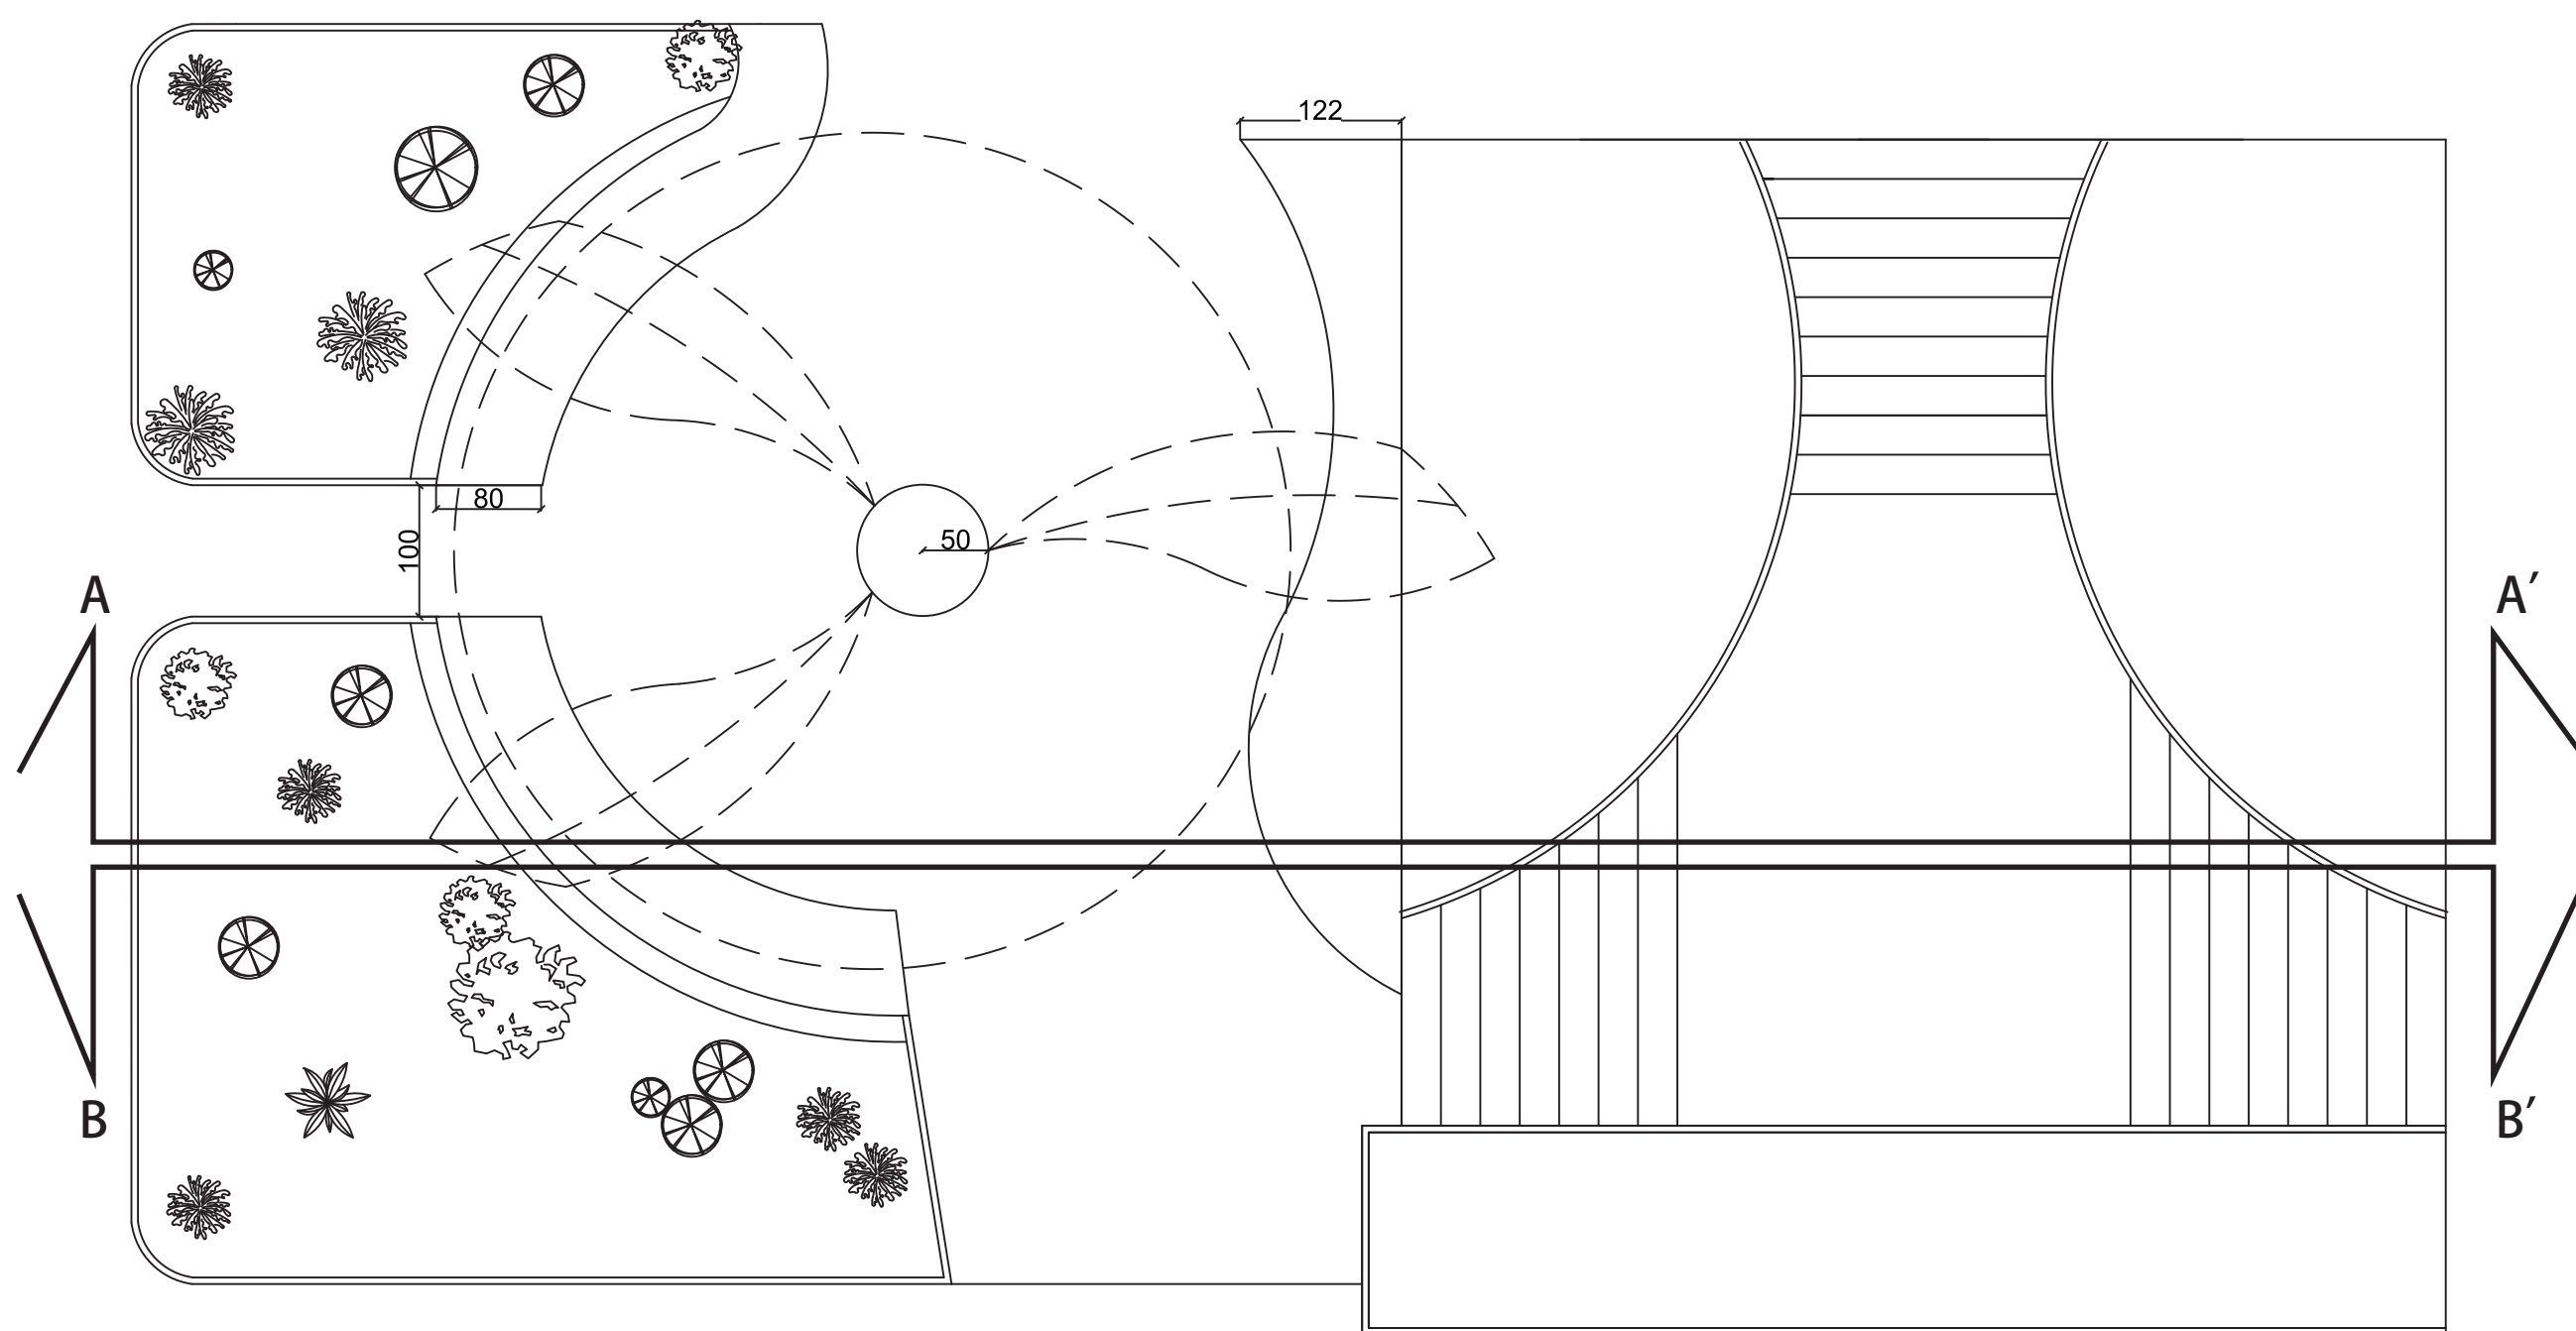

6 潔淨水與衛生

14 水下生命

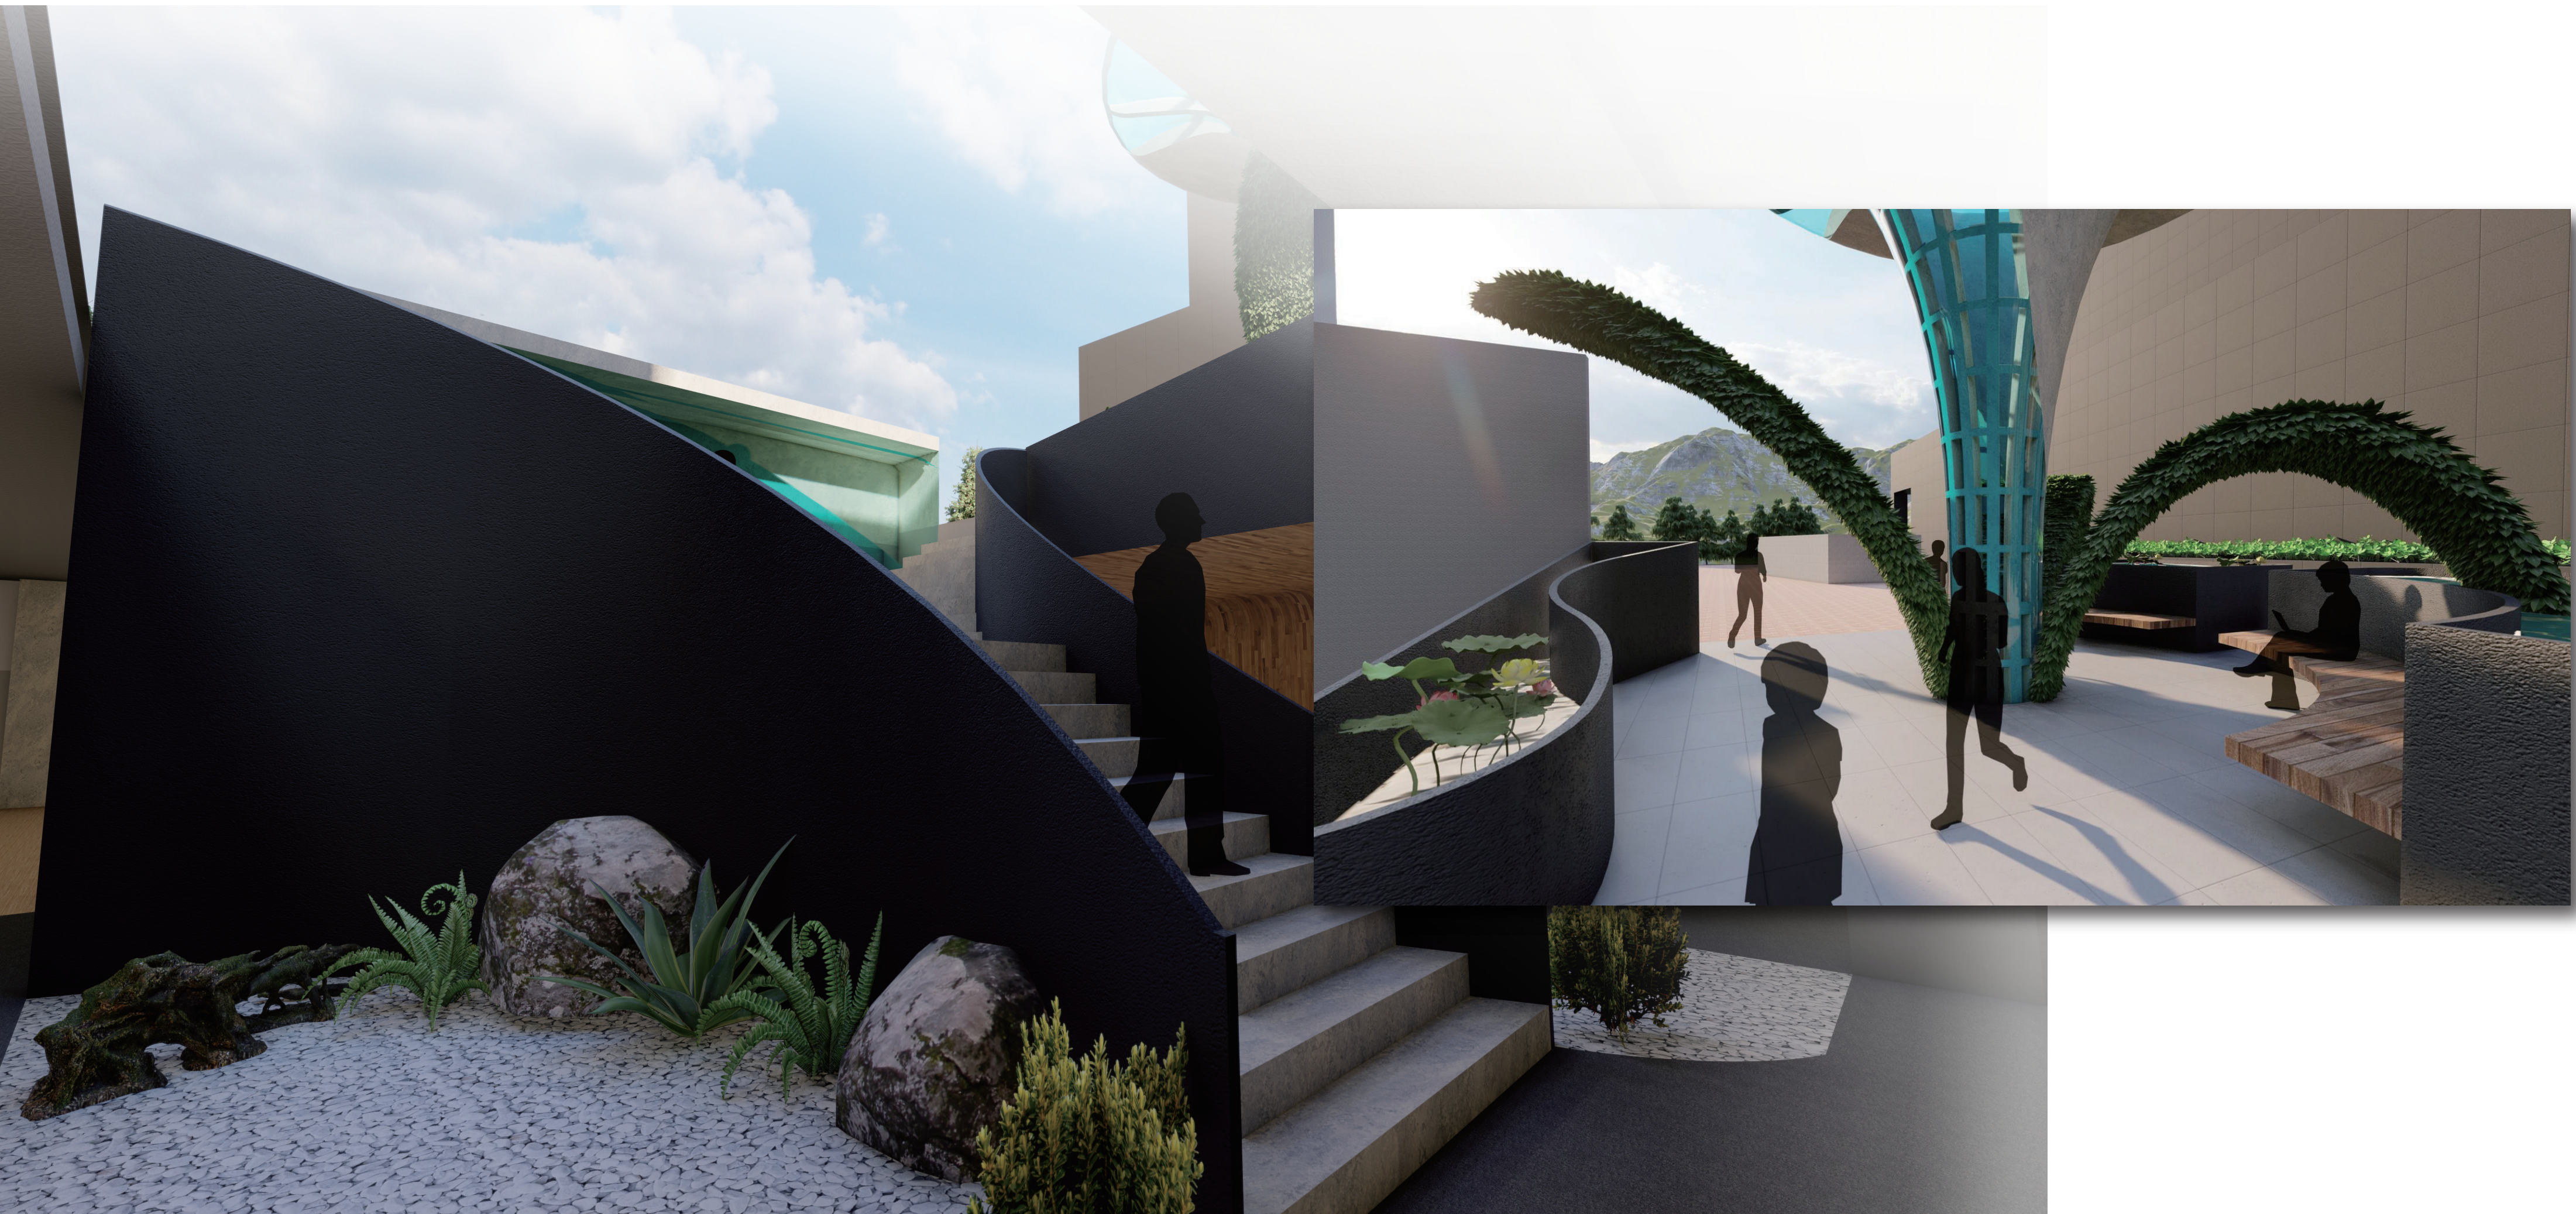

平面圖S=1 : 50

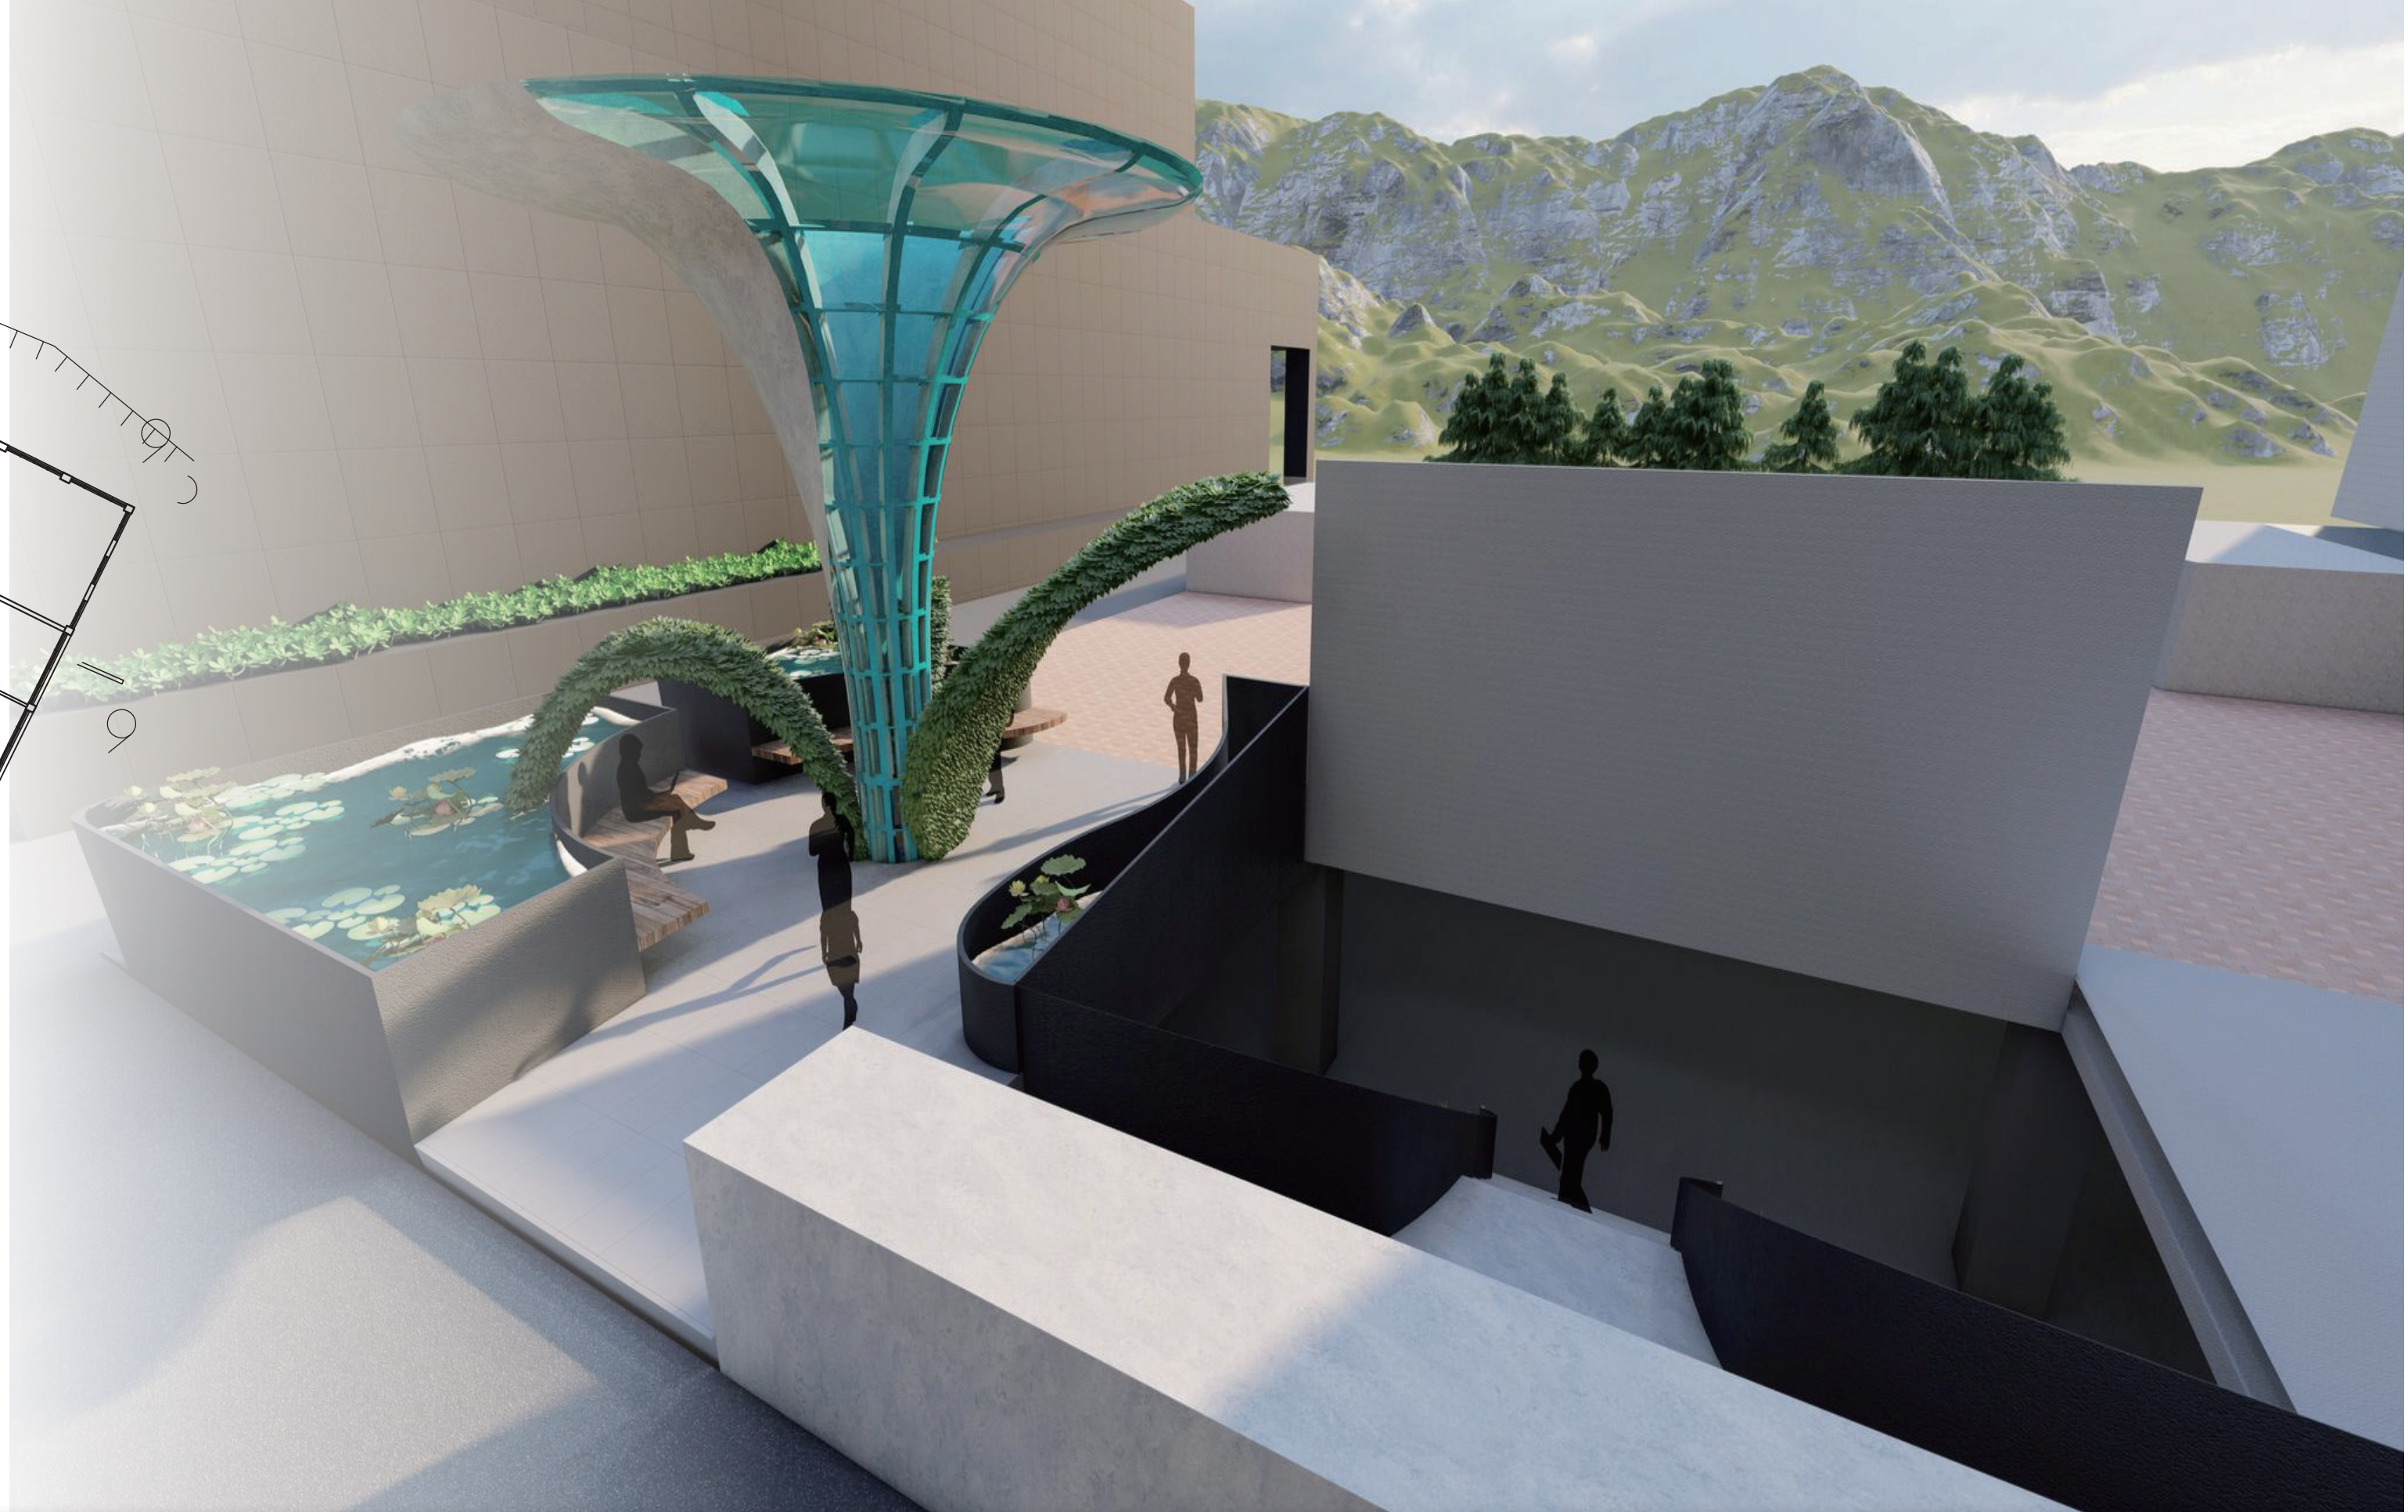

概念說明：

這次活力廣場的設計，選擇水下生命跟淨水兩項指標為主要設計方向。利用原本的座位休息區稍作改造。水下生命希望可以搭配綠化的設計，所以使用生態池作為設計主軸，中間雨水蒐集器以往上展開的花朵為造型設計，利用花的花瓣做出遮蔽及隧道的造型。利用水下生命及花的造型，水與水下生命的循環及利用。

基地位置

四向立面圖

S=1 : 50

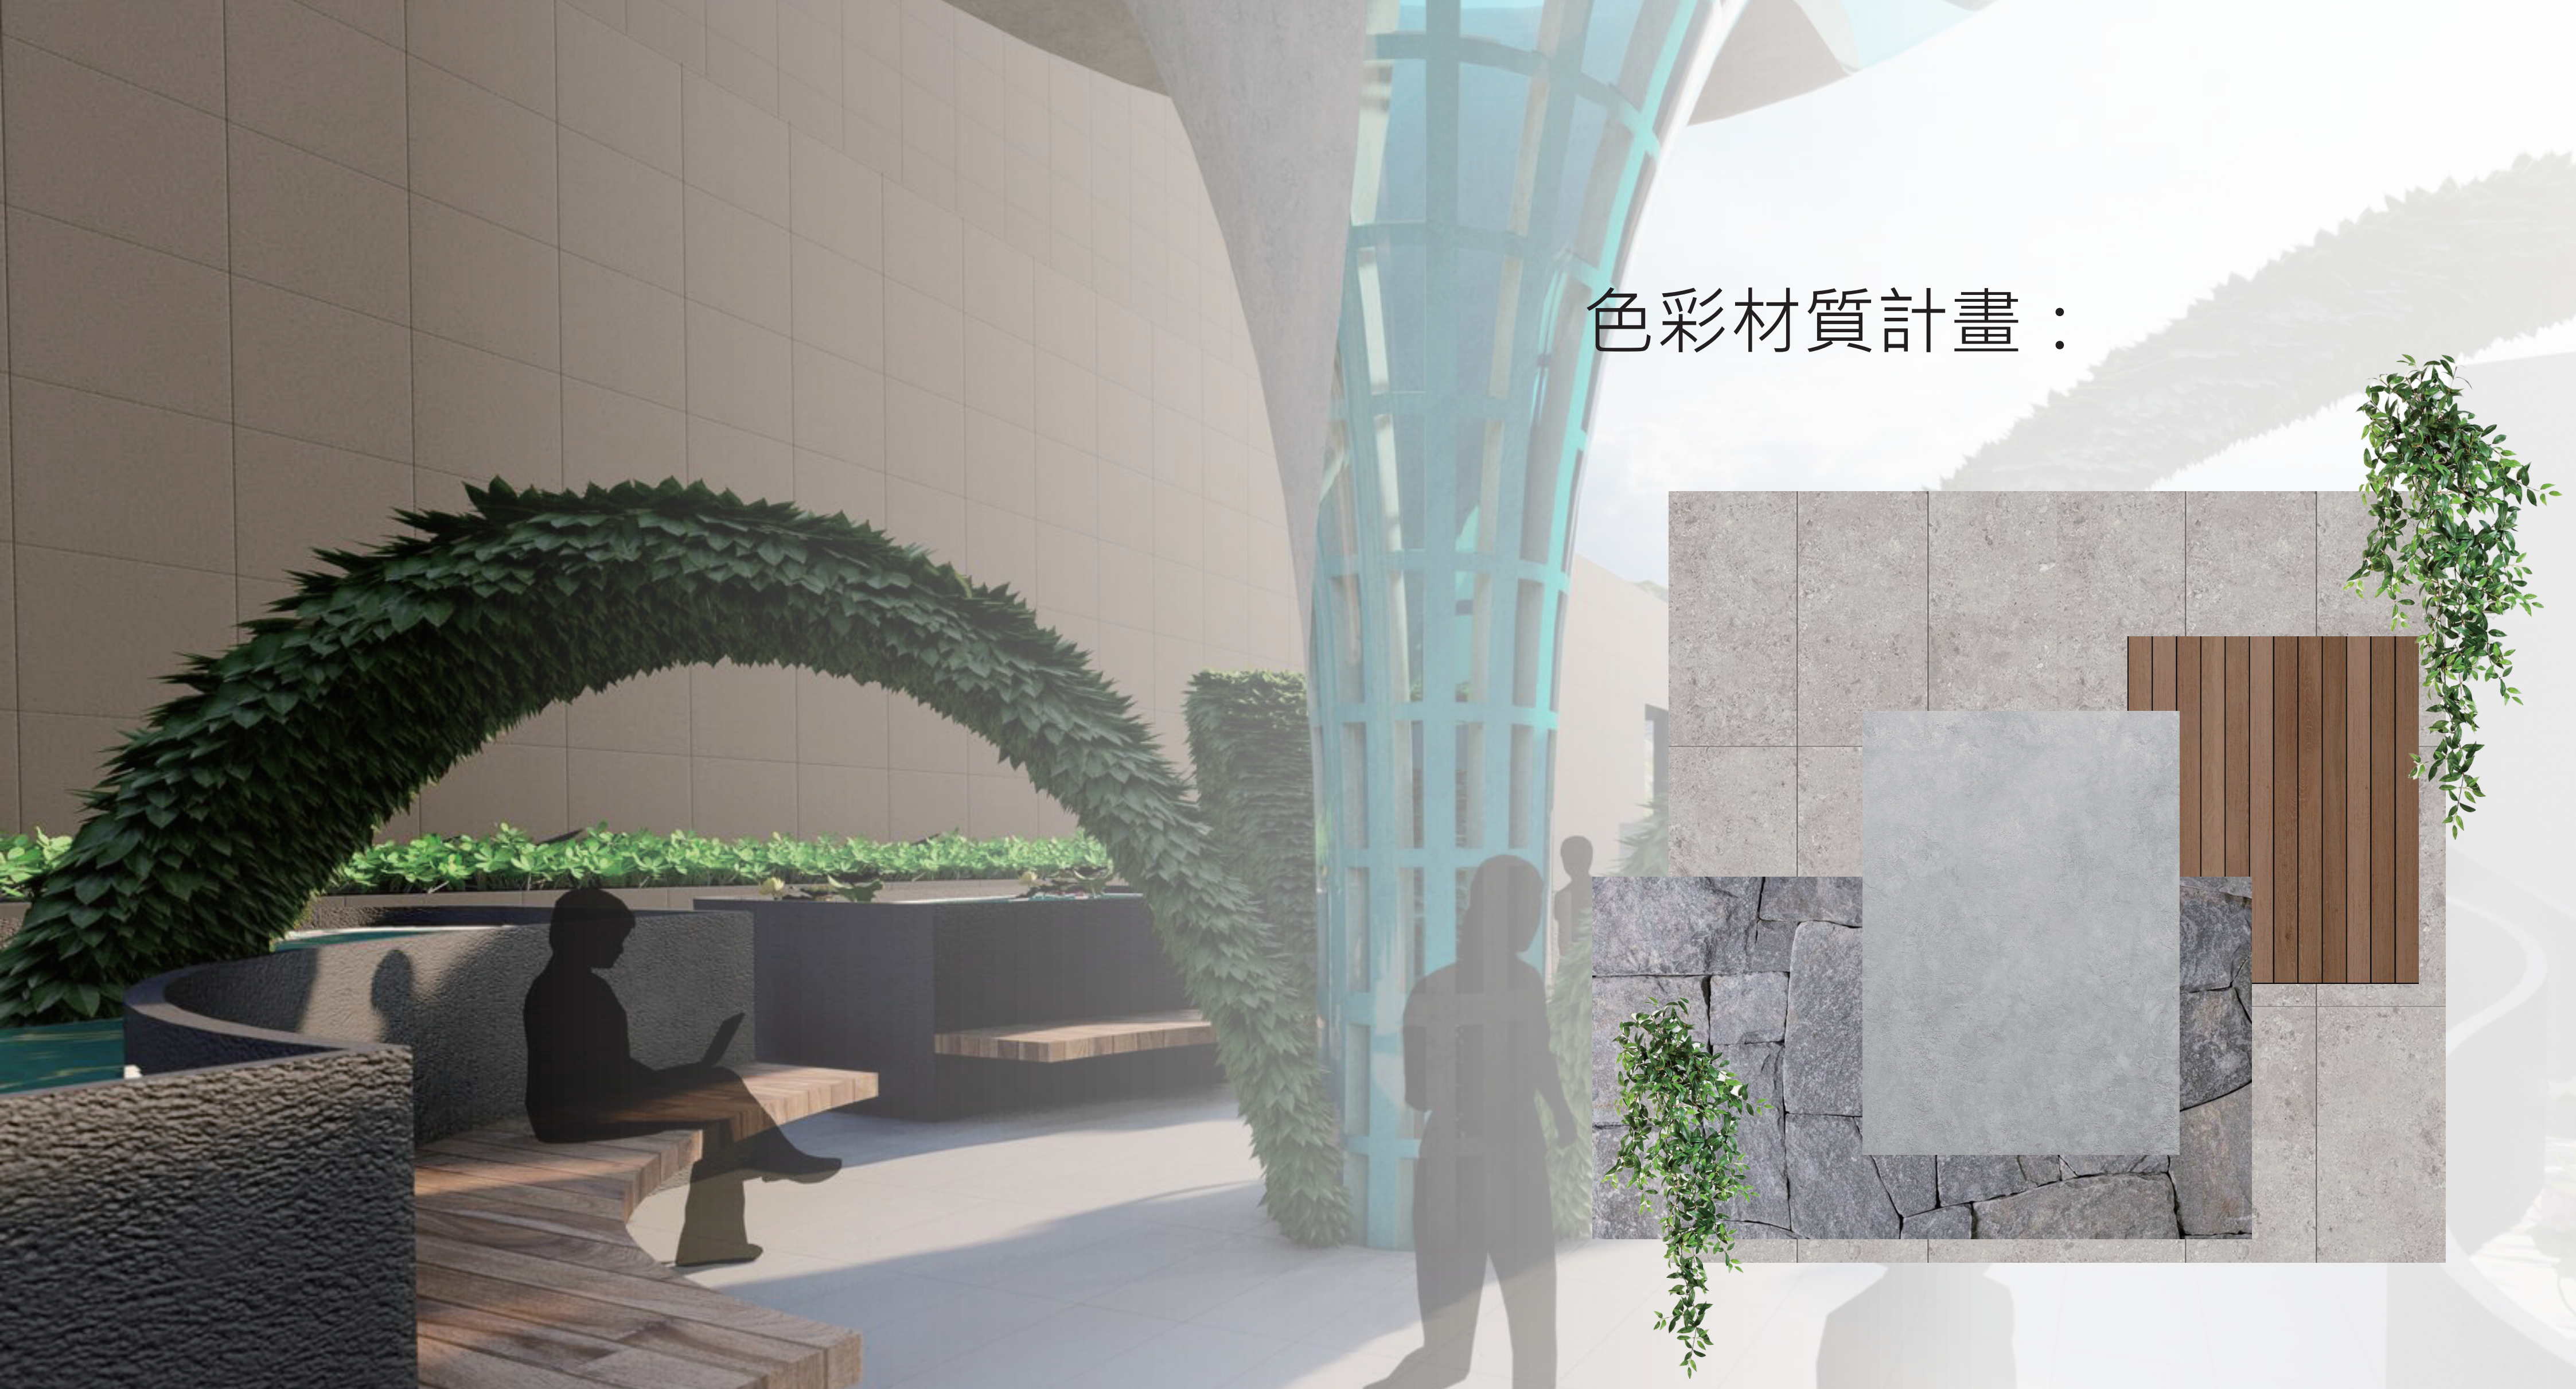

The image displays four architectural elevation drawings of a building facade, arranged horizontally. Each drawing shows a different view of the same structure, which features a central tower with a curved, ribbed roof and a base with a series of steps or a ramp. The drawings are rendered in a simple line-art style, showing the building's form and structural details. The first drawing on the left shows a side view with a ramp leading up to the base. The second drawing shows a front view with a central entrance and a series of steps. The third drawing shows a side view with a ramp leading up to the base. The fourth drawing on the right shows a front view with a central entrance and a series of steps.

An architectural section drawing of a building. The central feature is a large, blue, funnel-shaped structure with a white grid pattern, resembling a water feature or a large ventilation duct. It is flanked by green foliage. The structure is supported by a dark, modern architectural base with various levels and platforms. The background is a light gray sky, and the foreground shows the building's foundation and some structural elements.

A 3D architectural rendering of a modern building facade. The central feature is a large, curved, blue and white striped structure that resembles a stylized 'Y' or a waterfall. This structure is set against a grey background. To the left, there is a dark, curved structure that looks like a stylized 'C' or a partial 'Y'. To the right, there is a dark, curved structure that looks like a stylized 'C' or a partial 'Y'. The overall design is minimalist and modern, with a focus on geometric shapes and a limited color palette.
